CAST PRODUCTS — FIBERGLASS — METAL FABRICATION — MILLWORK

***JFK dreamed big. He said America chose to go to the moon, not because it was easy, but because it was hard. Scientists and engineers, aviators and wrench-turners achieved a seemingly impossible task. They changed the world forever.***

Your own projects can seem like a moon shot with details large and small that require talented people with a range of skills as big as the planet. You need your own NASA, a team of do-it-alls that make things happen.

Gist creates one-of-a-kind themed fabrications in fiberglass and other composites, natural and cast stone, even steel, aluminum and wood. Really, we can work in any material to build and install custom furniture, fixtures and architectural elements for resorts, restaurants, clubs, museums and retail environments. But that is not everything we can do for you.

Many Gist projects begin with a question, "Can you...?" We answer emphatically, "Yes, we can do that," opening the door to fulfilling our customers' wildest expectations. Look at your own projects. Not only can Gist handle the architectural details on the floors, walls and ceiling. It is the large sculpture or fountain in front of the building or in the lobby, the counters at a resort's check-in, concierge and valet; and the benches and trash receptacles in the public spaces. Even the custom light fixtures. We can engineer, build and install it all.

You might need traditional millwork to beautify a large hall or a robotic sculpture that breathes fire. In either case, we choose to go to the moon.

## Examples of Products Made

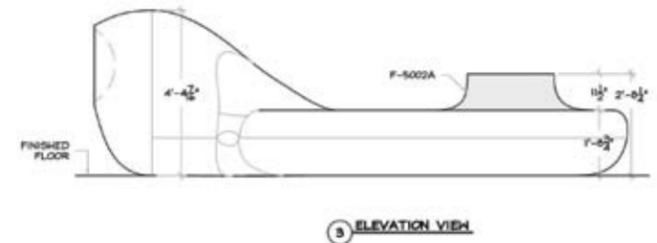

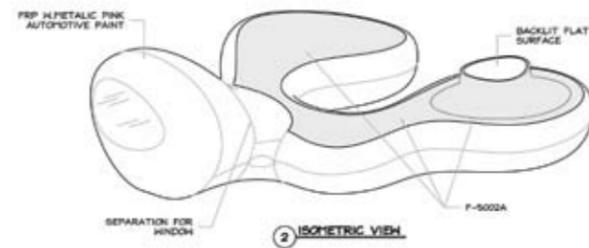

- Custom Sculptures
- Fountains
- Planters
- Columns
- Moldings
- Banquettes
- Tables
- Ash and Trash
- Accessories
- Amenities
- Case Goods
- Upholstered Goods
- Lighting
- Store Fixtures

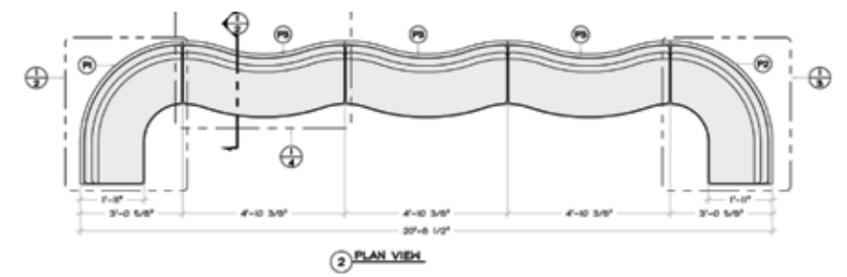

## Capabilities

- Fiberglass - FRP
- Concrete - GFRC
- Concrete - Precast
- Gypsum - GRG Casting
- Foam Handcoating
- Metal
- Wood
- Stone
- Glass
- Plastic
- Resin
- Fabric
